---QUERY 2: Viewing distinct store locations
SELECT DISTINCT store_location
FROM `workspace`.`default`.`bright_coffee_shop_8pm`;
```

```sql
---QUERY 3: Selecting specific columns
SELECT DISTINCT transaction_id,
                product_category,
                unit_price
FROM `workspace`.`default`.`bright_coffee_shop_8pm`
LIMIT 20;
```

```sql
---QUERY 4: Using a column alias
select product_category AS Category,
       unit_price AS Price
from `workspace`.`default`.`bright_coffee_shop_8pm`
limit 100;
```

```sql
---QUERY 5: Filtering using WHERE
SELECT *
FROM  `workspace`.`default`.`bright_coffee_shop_8pm`
WHERE product_category = 'Coffee';
```

```sql
---QUERY 6: Filtering using WHERE and AND
SELECT *
FROM  `workspace`.`default`.`bright_coffee_shop_8pm`
WHERE product_category = 'Coffee beans'
AND unit_price > 10;
```

```sql
---QUERY 7: Finding the minimum unit price
SELECT MIN(unit_price) AS Min_Price
FROM  `workspace`.`default`.`bright_coffee_shop_8pm`;
```

```sql
---QUERY 8: Finding the maximum unit price
SELECT MAX(unit_price) AS Min_Price
FROM  `workspace`.`default`.`bright_coffee_shop_8pm`;
```

```sql
---QUERY 9: Filtering using WHERE and OR
SELECT *
FROM  `workspace`.`default`.`bright_coffee_shop_8pm`
WHERE product_category = 'Coffee'
OR product_category = 'Tea';
```

```sql
---QUERY 10: Filtering using WHERE and IN
SELECT *
FROM  `workspace`.`default`.`bright_coffee_shop_8pm`
WHERE product_category IN ('Coffee' , 'Tea');
```

```sql
---QUERY 11: Sorting results
SELECT product_category,
       unit_price
FROM  `workspace`.`default`.`bright_coffee_shop_8pm`
ORDER BY unit_price DESC;
```

```sql
---QUERY 12: Counting total transactions
SELECT COUNT(*)
FROM  `workspace`.`default`.`bright_coffee_shop_8pm`;
```

```sql
---QUERY 13: Calculate total sales
SELECT SUM(transaction_qty* unit_price) AS Total_Sales
FROM  `workspace`.`default`.`bright_coffee_shop_8pm`;
```

```sql
---QUERY 14: Calculate minimum and maximum price
SELECT MIN(unit_price) AS cheapest_item,
       MAX(unit_price) AS most_expensive_item
FROM  `workspace`.`default`.`bright_coffee_shop_8pm`;
```

```sql
---QUERY 15: Total sales per category
SELECT product_category,
       SUM(transaction_qty* unit_price) AS Total_Sales
FROM  `workspace`.`default`.`bright_coffee_shop_8pm`
GROUP BY product_category
ORDER BY Total_Sales DESC;
```
